| CHAPTER 1 | Introduction to JavaFX | 1 |
| | The JavaFX Family | 1 |
| | JavaFX Mobile | |
| | JavaFX Script | 1 |
| | JavaFX Script's Relationship to Java | 2 |
| | Features and Advantages of JavaFX Script | 2 |
| | Current Status of JavaFX Script | 3 |
| | Getting the Most from This Book | 3 |
| | Summary | 3 |
| | Resources | 4 |
| CHAPTER 2 | Quick Start | 5 |
| | Choosing a JavaFX Development Environment | 5 |
| | Obtaining JavaFXPad | |
| | Obtaining an IDE Plug-In | |
| | The Eclipse Plug-In | |
| | The NetBeans Plug-In | |
| | Your First JavaFX Application: HelloJFX | |
| | Understanding the HelloJFX Application | |
| | Comments | |
| | The package Declaration | 10 |
| | import Statements | 10 |
| | Declarative Code That Defines the User Interface | 11 |
| | Using the Frame Class | 12 |
| | Creating String Literals | 13 |
| | Using the Canvas GUI Widget | 13 |
| | Drawing Text | 13 |
| | Defining Fonts | |
| | Running and Examining the HelloJFXBind Application | |
| | Structure of a Minimal JavaFX Class | |
| | The class Declaration | 17 |

| | attribute Declarations | |
|-----------|---|------|
| | Making an Instance of the Class | |
| | Declaring and Assigning Variables | . 18 |
| | Understanding Binding | . 19 |
| | Assigning Color Constants to the Text Object | . 20 |
| | Assigning an Array of Values to an Attribute | . 21 |
| | Moving the HelloJFXModel Class into Its Own File | . 22 |
| | Special Instructions for Running This Example with JavaFXPad. | . 24 |
| | Summary | . 26 |
| | Resources | . 27 |
| CHAPTER 3 | Creating User Interfaces in JavaFX | . 29 |
| | Overview of the Word Search Builder Application | . 29 |
| | Invoking the Application | . 30 |
| | A Tour of the Application | . 31 |
| | The Word Search Builder Application Architecture | . 36 |
| | The Declarative Code and Classes in the | |
| | wordsearch_jfx.ui Package | . 37 |
| | The Classes in the wordsearch_jfx.model Package | . 38 |
| | Creating the Frame and Menu Structure | . 39 |
| | The Exoskeleton of the Word Search Builder Ul | . 39 |
| | Creating Menus | . 45 |
| | Creating a MenuBar Widget | . 46 |
| | Creating Menu Widgets | . 47 |
| | Creating Menultem Widgets | . 48 |
| | Creating CheckBoxMenuItem Widgets | . 49 |
| | Visually Separating Menu Items | . 50 |
| | Table of Menu-Related Widgets | . 50 |
| | Invoking Java Methods from JavaFX | . 51 |
| | Instantiating the Model, Handler, and View Classes | . 53 |
| | Using Borders | . 55 |
| | Understanding JavaFX Layout Widgets | . 62 |
| | Using the GridPanel Layout Widget | . 62 |
| | Using the Box Layout Widget | . 64 |
| | Using the BorderPanel Layout Widget | . 65 |
| | The Layout Widget Types | . 66 |
| | Creating a ToolBar | . 69 |
| | Using Button Widgets on a Toolbar | |
| | Summary | |
| | Resources | . 78 |

| CHAPTER 4 | Creating JavaFX Classes and Objects | 81 |
|-----------|---|-----|
| | Testing the Word Search Builder Model | 81 |
| | Understanding the Structure of a JavaFX Class | |
| | Understanding Attribute Initializers | |
| | Introducing Triggers | 88 |
| | Defining the Body of an Operation | |
| | Producing Console Output | 89 |
| | Creating String Expressions | 90 |
| | Invoking an Operation Located in the Same Class | |
| | The for Statement | 90 |
| | Examining the Model Behind the Word Search Grid | 94 |
| | Understanding JavaFX Data Types | 107 |
| | Considerations When Declaring an Attribute | 108 |
| | Considerations When Declaring a var | 110 |
| | Defining and Using Named Instances (Constants) | 111 |
| | Creating Operations and Functions | |
| | Defining the Parameters and Return Type of an Operation | 112 |
| | Understanding the Effects of the new Operator | 114 |
| | Creating JavaFX Functions | 116 |
| | Understanding JavaFX Triggers | 116 |
| | Using JavaFX Statements and Operators | 117 |
| | The if/else Statement | 118 |
| | The while Statement | 119 |
| | The break Statement | 120 |
| | Using JavaFX Sequences | 127 |
| | Sequence Literals | |
| | Accessing a Specific Element of a Sequence | 131 |
| | Iterating Over an Sequence | 132 |
| | Inserting Sequence Elements | |
| | Querying Sequences | 133 |
| | Deleting Sequence Elements | |
| | Zeroing Out a Sequence | |
| | The JavaFX Statements | |
| | The JavaFX Operators | |
| | The Model Behind Each Word Search Grid Cell | |
| | The Model Behind the Word List Boxes | |
| | Naming Rules and Conventions for JavaFX Identifiers | |
| | Summary | |
| | Resources | |
| CHAPTER 5 | More UI Fun Including 2D Drawing | 147 |

| Understanding JavaFX 2D Graphic | . 147 |
|---|-------|
| Drawing and Painting Shapes | . 149 |
| Transforming Graphics Objects | . 150 |
| Using the Group Node to Group Shapes Together | . 150 |
| Canvas Mouse Events | . 155 |
| Using the var Pseudo-Attribute | . 157 |
| Creating Custom Graphical Components | . 158 |
| Extending CompositeNode | . 162 |
| Working with Images on the Canvas | . 163 |
| Controlling the Opacity of a Node | . 164 |
| Animating a Node | 165 |
| Using a Custom Component in a Program | 165 |
| Examining the WordGridView | |
| Custom Graphical Component | 166 |
| Using the PopupMenu Widget | . 175 |
| Creating Custom Widgets | 179 |
| Supplying a composeWidget() Operation | . 181 |
| Creating and Using the ListBox Widget | . 181 |
| Creating Dialog Boxes | . 182 |
| Using the JavaFX MessageDialog Class | . 192 |
| Using the Java Swing JOptionPane Class | 192 |
| Using the JavaFX Dialog Class | 194 |
| Experiencing the GroupPanel Layout | . 198 |
| Using the RadioButton Widget | . 198 |
| More JavaFX UI Components | . 198 |
| Summary | . 199 |
| Resources | 200 |
